## A

- Abstracts of Papers, 129, 531
- ABX PENTRA 120 Retic, 677
- Acetaldehyde, in ethanol intake assessment, 443
- Actins, muscle, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 76
- Activated partial thromboplastin time, clinical impact of more-sensitive reagents for, 225
- Adenocarcinoma
  - differential diagnosis of epithelial mesothelioma and, immunohistochemistry's role in, 75
  - hepatocellular, Ber-EP4 immunocapture for isolating circulating epithelial tumor cells in, 171
  - of lung, T1 N0 M0 and bronchioloalveolar, prognostic factors in, 391
  - of prostate, cytokeratin 34 $\beta$ E-12 immunoreactivity in benign prostatic acini, quantitation, pattern assessment, and electron microscopic study of, 69
- Adrenal cortex, tumors of, recommendations for reporting of, 451
- Adrenal medulla, tumors of, recommendations for reporting of, 451
- Adverse events, in molecular-genetic testing, 11, 14
- Agarose gel electrophoresis, for monoclonal gammopathy detection and identification, 411
- Air thermal cycler, in rapid practical RT-PCR-based approach for detection of PML/RARalpha fusion transcript in acute promyelocytic leukemia, 256
- Alcohol, current tests and new assays for assessment of ethanol intake, 443
- Allogeneic acute graft-vs-host disease, cutaneous, reappraisal of histopathologic criteria for diagnosis of, 791
- Alumina column methods, in acute iron overdose, performance characteristics of, 657
- Amyloid proteins, in fine-needle aspirates of abdominal fat, immunochemical microanalysis of, 403
- Angelman syndrome, molecular testing for, S25
- Antigen receptor gene rearrangements, in leukemia and lymphoma, S78

- Antigens. *See also* Prostate-specific antigen
  - myelomonocytic, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 80
  - nuclear, novel, rapid, multiparametric approach for flow cytometric analysis of intranuclear terminal deoxynucleotidyl transferase, 343
  - oncoplacental, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 79
- Antigranulocyte antibodies, in transfusion-related lung injury, 216
- Anti-HLA antibodies, in transfusion-related lung injury, 216
- Apoptosis, and thymoma-associated autoimmune enteropathy, 810
- Aspiration biopsy. *See* Fine-needle aspiration biopsy
- Astrocytoma, detection of p16, retinoblastoma, CDK4, and p53 gene deletion and amplification, by fluorescence in situ hybridization, 801
- Ataxia, spinocerebellar, molecular testing for, S21
- Atypia
  - cellular or nuclear, after fine-needle aspiration biopsy of the thyroid, 311
  - epithelial cell, in bronchoalveolar lavage specimens from lung transplant recipients, 204
- Atypical squamous cells of undetermined significance
  - long-term outcome and relative risk in women with, 57
  - subclassifying, in Thin-Prep cervical cytology, correlates with detection of high-risk human papillomavirus DNA, 384
- Auer rods, acute promyelocytic leukemia, with additional chromosomal abnormalities and absence of, 113
- Autoimmune enteropathy, thymoma-associated, a report of two cases of, 810
- Automated urine particle analysis, Sysmex UF-100 flow cytometer, vs chamber counting of supravitality stained specimens and conventional bacterial cultures, 25

## B

- B72.3, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75

- Bacteriuria, Sysmex UF-100 flow cytometer in detection of, 25
- Bartonella quintana* endocarditis, polymerase chain reaction for citrate synthase gene to diagnose, 36
- Basal cells, and cytokeratin 34 $\beta$ E-12 immunoreactivity in benign prostatic acini, 69
- Basidiobolomycosis, gastrointestinal, 610
- Basidiobolus ranarum*, 610
- B-cell infiltrates, cutaneous, abnormal immunoarchitecture and reproducible clonal bands identify biologic nature of, 495
- Bcl-1, and real-time 5'  $\rightarrow$  3' exonuclease-based polymerase chain reaction for detection of t(11;14)(q13;q32), 524
- Bcl-6, as marker for differentiating follicle center lymphomas from other low-grade lymphoproliferative disorders, 101
- Ber-EP4  
for circulating epithelial tumor cell isolation before RT-PCR detection, efficiency of, 171  
in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- Biomarkers, serum, of liver regeneration, as allowing early prediction of hepatic recovery after acute necrosis, 351
- Biopsy. *See also* Fine-needle aspiration biopsy  
intravascular B-cell lymphoma, report of five cases initially diagnosed by bone marrow biopsy, 248  
low-grade squamous intraepithelial lesion biopsies after high-grade smears, correlation with high-risk human papillomavirus and greater risk of high-grade lesions on follow-up, 765  
sentinel lymph node, for breast carcinoma staging, 599, 627
- Bladder, carcinoma of, keratin immunohistochemistry as enhancing detection of micrometastases in pelvic lymph nodes from patients with high-grade urothelial, 649
- Blood. *See also* Blood cell counts; Coagulation; Platelets; Transfusion  
peripheral  
cytomegalovirus-infected cells in routinely prepared films of immunosuppressed patients, 108  
intravascular B-cell lymphoma detected by examination of, 248  
umbilical cord, autopsy findings in recipients of, 335
- Blood banking, operating theater blood transaction system as "virtual" blood transfusion service, 481
- Blood cell counts  
automated reticulocyte counting and immature reticulocyte fraction measurement, 677  
refrigerated storage improving stability of complete blood cell count and automated differential, 687
- Bone lesions, lytic, precursor B lymphoblastic lymphoma presenting as, 836
- Bone marrow  
intravascular B-cell lymphoma, report of five cases initially diagnosed by biopsy of, 248  
lymphoid aggregates in, mimic residual lymphoma after rituximab therapy for non-Hodgkin lymphoma, 844  
transplantation of  
cutaneous allogeneic graft-vs-host disease, reappraisal of histopathologic criteria for diagnosis of, 791  
multidimensional flow cytometry as predicting biologic significance of rare peripheral blasts after hematopoietic cell transplantation, 513  
umbilical cord blood recipients, autopsy findings in, 335
- Book Reviews, 119, 271, 574, 720, 875
- Breast cancer  
carcinoma  
cell cycle regulators as prognostic indicator for, S47  
estrogen and progesterone receptor contents in Thin-Prep-processed fine-needle aspirates of, 50  
sentinel lymph node biopsy for staging of, 599, 627  
syndecan-1 expression is induced in the stroma of infiltrating, 377  
telomerase activity in, S70  
HER-2/*neu* gene and protein in, S53  
molecular screening for, S9  
prognostic significance of p34<sup>cdc2</sup> cyclin-dependent kinase and MIB1 overexpression, and HER-2/*neu* gene amplification detected by fluorescence in situ hybridization in, 459
- Breath alcohol analysis, 446
- Bronchoalveolar lavage specimens, epithelial cell atypia in, from lung transplant recipients, 204
- Bsm1* polymorphism, of vitamin D receptor gene, in hyperparathyroid or hypoparathyroid dialysis patients, 366
- Burkitt lymphoma, de novo CD5<sup>+</sup>, 828

## C

- Cadherins, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- Calcium-binding proteins, intracellular, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 80
- Calretinin, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- Cancer. *See also* Neoplasms  
molecular screening for, S8
- Capillary zone electrophoresis, for monoclonal gammopathy detection and identification, 411
- Carbohydrate-deficient transferrin, as marker of ethanol intake, 443
- Carcinoembryonic antigen, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- Carcinoma. *See also* Adenocarcinoma  
of bladder, keratin immunohistochemistry as enhancing detection of micrometastases in pelvic lymph nodes from patients with high-grade urothelial, 649  
of breast. *See* Breast cancer  
cell cycle regulators as prognostic indicator for, S47  
of lung. *See* Lung  
pancreatic, differential *MUC 1* expression in normal and neoplastic human pancreatic tissue, 635

- of prostate. *See* Prostate cancer
- renal cell. *See* Kidney
- Cardiac surgery, preoperative coagulation screening, of pediatric patients, 225
- Cardiac troponins
  - Abbott AxSYM cardiac troponin I assay, analytical and clinical evaluation of, 745
  - false-positive troponin I in the MEIA due to presence of rheumatoid factors in serum, elimination of this interference by using a polyclonal antisera against rheumatoid factors, 753
  - specificity of, 739
- CD5, de novo CD5<sup>+</sup> Burkitt lymphoma/leukemia, 828
- CD15, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- CD20, and lymphoid aggregates in bone marrow mimicking residual lymphoma after rituximab therapy for non-Hodgkin lymphoma, 844
- CD30, expression in mediastinal large B-cell lymphoma, 155, 241
- CD34, in acute promyelocytic leukemia, 819
- CD44, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- Cell cycle regulation, abnormal, in malignancy, S40
- Cell sorting, fluorescence activated, and CD34 involvement in acute promyelocytic leukemia, 819
- Cell surface glycoproteins, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 76
- C-erb-B2* gene. *See* HER-2/*neu* gene
- Cervical dysplasia
  - atypical squamous cells of undetermined significance
    - long-term outcome and relative risk in women with, 57
    - subclassifying in Thin-Prep cervical cytology, correlates with detection of high-risk human papillomavirus DNA, 384
  - low-grade squamous intraepithelial lesion biopsies after high-grade smears, correlation with high-risk human papillomavirus and greater risk of high-grade lesions on follow-up, 765
  - molecular screening for, S9
- Chamber counting, Sysmex UF-100 flow cytometer vs, 25
- Charcot-Marie-Tooth disease, molecular testing for, S26
- Checkpoints, in cell cycle regulation, S40
- Chlamydia trachomatis*, and plasma cell endometritis, 211
- Chondroblastoma, tau protein and tubulin expression in, 189
- Chondroid tumors, tau protein and tubulin expression in, 189
- Chondrosarcoma, extraskeletal myxoid, tau protein and tubulin expression in, 189
- Chordoma, tau protein and tubulin expression in, 189
- Chromatography
  - gas, ethanol quantitation in blood and other body fluids by, 444
  - high-performance liquid
    - for plasma total homocysteine measurement, fluorescence polarization immunoassay compared with, 757
    - for whole blood cyclosporine concentration determination, 358
- Chromosomal abnormalities
  - in abnormal cell cycle regulation, S40
  - acute promyelocytic leukemia, with additional, and absence of Auer rods, 113
  - in inherited diseases, S19
- Chromosomal translocations
  - in leukemia and lymphoma, S78
  - t(11;14)(q13;q32), real-time 5' → 3' exonuclease-based polymerase chain reaction for detection of, 524
  - t(15;17), and acute promyelocytic leukemia, 113, 256, 819
  - t(X;18), SYT-SSX fusion products, absence of, in soft tissue tumors other than synovial sarcoma, 43
- Circulating tumor cells, Ber-EP4 antibody for isolating before RT-PCR, efficiency of, 171
- Citrate synthase gene, polymerase chain reaction for, in *Bartonella quintana* endocarditis diagnosis, 36
- Clonality
  - abnormal immunoarchitecture and reproducible clonal bands identify biologic nature of cutaneous B-cell infiltrates, 495
  - analysis using X-chromosome inactivation at the human androgen receptor gene, evaluation of large cohorts of patients with chronic myeloproliferative diseases, secondary neutrophilia, and reactive thrombocytosis, 93
- Cloned enzyme donor immunoassay, for whole blood cyclosporine concentration determination, 358
- Clotting. *See* Coagulation
- Coagulation
  - a novel clotting assay for quantitation of plasma prothrombin using *Echis multisquamatus* venom, 705
  - prothrombin time and activated partial thromboplastin time, clinical impact of more-sensitive reagents for, 225
  - Rocky Mountain and Mediterranean spotted fever affecting, 159
  - von Willebrand disease, Australasian laboratory testing, diagnosis, and management of, 712
- Colorectal cancer, molecular screening for, S9
- Comparative genomic hybridization, S14
- Complete blood cell count, refrigerated storage improving stability of, 687
- Computer-based proficiency test for screeners of Papanicolaou smears, 769
- Cord blood, autopsy findings in recipients of, 335
- Corrections, 428, 724
- Correspondence, 119, 273, 425, 576, 721, 878
- Cost-benefit analysis, of molecular testing, S7
- Cost minimization analysis
  - of pathologists' assistants, 619
  - of telepathology, 470
- Crossmatching, electronic, in operating theater blood transaction system, 481
- Cryptosporidium parvum*, in ancient fecal specimens, 595, 605
- Cutaneous allogeneic acute graft-vs-host disease, reappraisal of histopathologic criteria for diagnosis of, 791
- Cutaneous B-cell infiltrates, abnormal immunoarchitecture and reproducible clonal bands identify biologic nature of, 495

Cutoff values, for enzyme-linked immunosorbent assay in serodiagnosis of hepatitis C virus, effect of new evaluation of, in Brazilian patients, 418

Cyclin, in cell cycle regulation, S40

Cyclin-dependent kinase  
in cell cycle regulation, S40  
fluorescence in situ hybridization for detecting deletion and amplification of CDK4 gene, in 96 cases of glioma, 801

Cyclin-dependent kinase inhibitors, in cell cycle regulation, S40

Cyclosporine, four automated methods for determination of whole blood concentrations of, 358

Cystic fibrosis, molecular testing for, S22

Cytogenetics  
and cell cycle regulation in malignancy, S43  
molecular, S12

Cytokeratin  
cytokeratin 34 $\beta$ E-12 immunoreactivity in benign prostatic acini, quantitation, pattern assessment, and electron microscopic study of, 69  
in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75  
immunohistochemistry for, as enhancing detection of micrometastases in pelvic lymph nodes from patients with high-grade urothelial carcinoma of the bladder, 649  
subsets for distinguishing monophasic synovial sarcoma from malignant peripheral nerve sheath tumor, 641

Cytokines, related to coagulation, Rocky Mountain and Mediterranean spotted fever affecting, 165

Cytology. *See also* Papanicolaou smear  
estrogen and progesterone receptor contents in Thin-Prep-processed fine-needle aspirates of the breast, 50  
imprint, of sentinel lymph nodes, 627  
subclassifying atypical squamous cells in Thin-Prep cervical, correlates with detection of high-risk human papillomavirus DNA, 384

Cytomegalovirus, infected cells in routinely prepared peripheral blood films of immunosuppressed patients, 108

Cytoskeletal proteins, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75

## D

Deferoxamine, serum iron and total iron-binding capacity measurements affected by, 657

Deletions, molecular testing for, S24

Deoxynucleotidyl transferase, intranuclear terminal, novel, rapid, multiparametric approach for flow cytometric analysis of, 343

Diabetes mellitus, laboratory diagnosis and monitoring of, 665

Diarrheal disease, and thymoma-associated autoimmune enteropathy, a report of two cases, 810

Differential counts, refrigerated storage improving stability of complete blood cell count and automated, 687

D-Dimer, short-term changes in estrogen levels during in vitro fertilization and level of, 485

Direct mutation analysis, molecular testing for, S19

DNA analysis, in forensic identity testing, S93

Dot blot procedure, reverse, in forensic identity testing, S96

Drug testing, and forensic identity testing, S98

Duchenne muscular dystrophy, molecular testing for, S24

Duplications, molecular testing for, S26

## E

*Echis multisquamatus* venom, a novel clotting assay for quantitation of prothrombin using, 705

Economic issues in molecular pathology and diagnostics, S7

Ehrlichiosis, human granulocytic, molecular techniques in diagnosis of, S37

Elastic stains, invasion of visceral pleura, in lung carcinoma, diagnosis and significance of, histologic predictors and the role of, 777

Electrophoresis, capillary zone, immunosubtraction, agarose gel, and immunofixation, in detection and identification of monoclonal gammopathies, 411

Emerging infectious diseases, 595  
molecular diagnostics for, S33

Endocarditis, *Bartonella quintana*, polymerase chain reaction for citrate synthase gene to diagnose, 36

Endometritis, plasma cell, *Chlamydia trachomatis* as associated with, 211

Endosalpingiosis, and micrometastasis of bladder cancer, 649

Endothelium  
cytomegalovirus-infected cells in routinely prepared peripheral blood films of immunosuppressed patients, 108  
endothelial hyperplasia, after fine-needle aspiration biopsy of the thyroid, 311  
Rocky Mountain and Mediterranean spotted fever affecting, 159

End-stage renal disease, *BsmI* polymorphism of vitamin D receptor gene, in hyperparathyroid or hypoparathyroid dialysis patients, 366

Enteropathy, autoimmune, thymoma-associated, a report of two cases of, 810

Enteroviral meningoencephalitis, diagnosis with polymerase chain reaction, S35

Enzymatic assay, ethanol quantitation in blood and other body fluids by, 445

Enzyme-linked immunosorbent assay  
in hepatitis C virus serodiagnosis, effect of new evaluation of cutoff values for, in Brazilian patients, 418  
TRAP-eze ELISA telomerase detection kit, S69

Enzyme multiplied immunoassay, for whole blood cyclosporine concentration determination, 358

Eosinophils, in gastrointestinal basidiobolomycosis, 610

Epithelial cell atypia, in bronchoalveolar lavage specimens from lung transplant recipients, 204

Epstein-Barr virus, malignant lymphoma of thyroid, a 30-year clinicopathologic experience and evaluation of the presence of, 263

- Error, in molecular-genetic testing, 11, 14
- Estrogen, short-term changes in level of, and increased fibrinolysis during in vitro fertilization, 485
- Estrogen receptor, in Thin-Prep-processed fine-needle aspirates of breast, 50
- Ethanol, current tests and new assays for assessment of intake of, 443
- 5' → 3' exonuclease activity of *Taq* polymerase, 524

## F

- Factor II, a novel clotting assay for quantitation of, using *Echis multisquamatus* venom, 705
- Fasting plasma glucose, in diagnosis and monitoring of diabetes mellitus, 665
- Fat, immunochemical microanalysis of amyloid proteins in fine-needle aspirates of abdominal, 403
- Fatty acid ethyl esters, in ethanol intake assessment, 443
- Fecal parasites, ancient specimens of, 605
- $\alpha$ -Fetoprotein, in reverse transcriptase-polymerase chain reaction isolation of circulating tumor cells, 171
- Fibrinolysis
  - Rocky Mountain and Mediterranean spotted fever affecting, 163
  - short-term changes in estrogen levels as producing increased levels of, during in vitro fertilization, 485
- Fibroadenoma, syndecan-1 expression is induced in the stroma of infiltrating breast carcinoma, 377
- Fibrosis, as prognostic factor in T1 N0 M0 and bronchioloalveolar adenocarcinomas of the lung, 391
- Fine-needle aspiration biopsy
  - amyloid protein aspirates of abdominal fat, immunochemical microanalysis of, 403
  - of breast, estrogen and progesterone receptor contents in Thin-Prep-processed aspirates, 50
  - of soft tissue sarcomas, a cytomorphologic analysis with emphasis on histologic subtyping, grading, and therapeutic significance, 179
  - of thyroid, histologic alterations following, 311

Subtyping, histologic, of soft tissue sarcomas, fine-needle aspiration biopsy in, 179

Surgery, operating theater blood transaction system for, 481

Surgical pathology, pathologists' assistants in, 597, 619

Syndecan-1, expression is induced in the stroma of infiltrating breast carcinoma, 377

Synovial sarcoma

monophasic, cytokeratin subsets for distinguishing malignant peripheral nerve sheath tumor from, 641

- SYT-SSX fusion products, absence of, in soft tissue tumors other than, 43
- Syphilitic lymphadenopathy, histology and human immunodeficiency virus status of, 330
- Sysmex R-2000, for automated reticulocyte counting and immature reticulocyte fraction measurement, 677
- Sysmex UF-100 flow cytometer, vs chamber counting of supravital stained specimens and conventional bacterial cultures, 25
- SYT-SSX fusion products, absence of, in soft tissue tumors other than synovial sarcoma, 43

- T**
- T(11;14)(q13;q32) translocation, real-time 5' → 3' exonuclease-based polymerase chain reaction for detection of, 524
  - T(15;17) translocation, and acute promyelocytic leukemia, 113, 256, 819
  - Taq polymerase, 5' → 3' exonuclease activity of, 524
  - Tau proteins, expression of, in extraskeletal myxoid chondrosarcoma, chordoma, and other chondroid tumors, 189
  - Telepathology, cost minimization analysis of, 470
  - Telomerase, in human solid tumors, S68
  - Telomeric repeat amplification protocol, S69
  - Terminal deoxynucleotidyl transferase, intranuclear, novel, rapid, multiparametric approach for flow cytometric analysis of, 343

- Thin-Prep
  - estrogen and progesterone receptor contents in Thin-Prep-processed fine-needle aspirates of breast, 50
  - subclassifying atypical squamous cells in Thin-Prep cervical cytology, correlates with detection of high-risk human papillomavirus DNA, 384
- Thrombin-antithrombin complexes, short-term changes in estrogen levels during in vitro fertilization and level of, 485
- Thrombocytosis, reactive, clonality analysis using X-chromosome inactivation at the human androgen receptor gene, evaluation of large cohorts of patients with, 93
- Thrombomodulin
  - in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
  - Rocky Mountain and Mediterranean spotted fever affecting expression of, 164
- Thrombosis, venous, *Agkistrodon contortrix* venom test in screening for identified and unidentified protein C pathway defects in patients with, 233
- Thymoma
  - classification of, 299, 304, 308
  - thymoma-associated autoimmune enteropathy, a report of two cases of, 810
- Thyroid
  - malignant lymphoma of, a 30-year clinicopathologic experience and evaluation of the presence of Epstein-Barr virus in, 263
  - post fine-needle aspiration biopsy histologic alterations of, 311
- Total iron-binding capacity, in acute iron overdose, performance characteristics of, 657

- Toxicology
  - ethanol intake, current tests and new assays for assessment of, 443
  - total iron-binding capacity in acute iron overdose, performance characteristics of, 657
- Toxic shock syndrome toxin-1, S36
- Transferrin, carbohydrate-deficient, as marker of ethanol intake, 443
- Transfusion
  - in operating theater blood transaction system, 481
  - transfusion-related lung injury, pathology of, 216
- Translocations, chromosomal. *See* Chromosomal translocations
- Transplantation
  - bone marrow. *See* Bone marrow
  - cytomegalovirus-infected cells in routinely prepared peripheral blood films of immunosuppressed patients, 108
  - lung, epithelial cell atypia in bronchoalveolar lavage specimens from recipients of, 204
- TRAP-eze telomerase detection kit, S69
- Treponema pallidum*, syphilitic lymphadenopathy, histology and human immunodeficiency virus status of, 330
- Trinucleotide expansion diseases, molecular testing for, S19
- Troponins, cardiac. *See* Cardiac troponins
- Tubulin, expression of, in extraskeletal myxoid chondrosarcoma, chordoma, and other chondroid tumors, 189
- Tumors. *See* Neoplasms
- T(X;18) translocation, SYT-SSX fusion products, absence of, in soft tissue tumors other than synovial sarcoma, 43

## U

- Umbilical cord blood, autopsy findings in recipients of, 335
- Urinalysis
  - ethanol quantitation, 446
  - Sysmex UF-100 flow cytometer vs chamber counting of supravital stained specimens and conventional bacterial cultures, evaluation of, 25

## V

- Vascular space invasion, as prognostic factor in T1 N0 M0 and bronchioloalveolar adenocarcinomas of the lung, 391
- Venom. *See* Snake venom
- Visceral pleura, in lung carcinoma, diagnosis and significance of, histologic predictors and the role of elastic stains, 777
- Vitamin D receptor gene, *BsmI* polymorphism of, in hyperparathyroid or hypoparathyroid dialysis patients, 366
- Vitreous humor, ethanol quantitation in, 446
- Von Willebrand disease, Australasian laboratory testing, diagnosis, and management of, 712
- Von Willebrand factor, in von Willebrand disease, 712

## W

- WBC differential counts, refrigerated storage improving stability of complete blood cell count and automated differential, 687
- Western blotting, in microanalysis of amyloid proteins in fine-needle aspirates of abdominal fat, 403
- Wilms tumor gene, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75
- WT1, in epithelial mesothelioma and adenocarcinoma differential diagnosis, 75

## X

- X-chromosome inactivation, at the human androgen receptor gene, clonality analysis using, evaluation of large cohort of patients with chronic myeloproliferative diseases, secondary neutrophilia, and reactive thrombocytosis, 93

## Z

- Zygomycosis, *Basidiobolus ranarum* as causative agent of, 610
